† Not applicable.

¹This is the total number of single-outlet public libraries (centrals) on the public library outlet data file. Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

²The response rate is the total number of single-outlet public libraries (centrals) on the public library outlet data file divided by the number of single-outlet public libraries (centrals) on the public library data file.

³The average square footage is calculated by dividing the total square footage reported by single-outlet public libraries (centrals) by the total number of such outlets reporting the data.

⁴Per 1,000 population data are based on the total unduplicated population of legal service areas. Only single-outlet public libraries (centrals) that reported square footage are included.

⁵The square footage response rate is calculated by dividing the total number of single-outlet public libraries (centrals) reporting square footage by the total number of single-outlet public libraries (centrals) on the public library outlet data file. IMLS ensures as part of edit follow-up that the number of outlets reported on the public library outlet data file equals the number reported on the public library data file.

NOTE: Square footage is collected only from central and branch outlets (not from bookmobiles and books-by-mail-only outlets), and missing data

are not imputed. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands).

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2011. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

Table 31A. Number and square footage of single-outlet public libraries in the 50 states and the District of Columbia, by population of legal service area: Fiscal year 2011

¹This is the total number of multiple-outlet public libraries on the public library outlet data file (multiple outlets consisting of bookmobiles only are excluded). Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

²The response rate is the number of multiple-outlet public libraries on the public library outlet data file divided by the number of multiple-outlet public libraries on the public library data file.

³The average square footage is calculated by dividing the total square footage reported by multiple-outlet public libraries (centrals or branches) by the total number of such outlets reporting the data.

⁴Per 1,000 population data are based on the total unduplicated population of legal service areas. Only multiple-outlet public libraries that reported square footage for their central outlets are included in the "Per 1,000 population" figure for centrals. Only multiple-outlet public libraries that reported square footage for all of their branch outlets are included in the "Per 1,000 population" figure for branches.

⁵The square footage response rate is calculated by dividing the number of multiple-outlet libraries (centrals or branches) reporting square footage by the number of such outlets on the public library outlet data file. IMLS ensures as part of edit follow-up that the number of outlets reported on the public library outlet data file equals the number reported on the public library data file.

NOTE: Square footage is collected only from central and branch outlets (not from bookmobiles and books-by-mail-only-outlets), and missing data are not imputed. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands).

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2011. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

Table 32A. Number and square footage of multiple-outlet public libraries in the 50 states and the District of Columbia, by type of outlet and population of legal service area: Fiscal year 2011

Population of legal service area	Number of public libraries	Number of multiple-outlet libraries ¹	Square footage of central outlets			Square footage of branch outlets

Less than 1,000	916	1	1	1,361	2,257	1	450	1,493

¹This is the total number of multiple-outlet public libraries on the public library outlet data file (multiple outlets consisting of bookmobiles only are excluded). Total includes

the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

²The average square footage is calculated by dividing the total square footage reported by multiple-outlet public libraries (centrals or branches) by the total number of such outlets reporting the data.

³Per 1,000 population data are based on the total unduplicated population of legal service areas. Only multiple-outlet public libraries that reported square footage for their central outlets are included in the "Per 1,000 population" figure for centrals. Only multiple-outlet public libraries that reported square footage for all of their branch outlets are included in the "Per 1,000 population" figure for branches.

NOTE: Square footage is collected only from central and branch outlets (not from bookmobiles and books-by-mail-only outlets), and missing data are not imputed. The response rates are included in Table 32.

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2011. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

Table 33. Number and square footage of central outlets of public libraries, by population of legal service area and state: Fiscal year 2011

— Not available.

† Not applicable.

¹This is the total number of central outlets on the public library outlet data file. Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

²The response rate is the number of central outlets on the public library outlet data file divided by the number of centrals on the public library data file.

³The average square footage of central outlets is calculated by dividing the total square footage reported by central outlets by the total number of such outlets reporting the data.

⁴The square footage response rate is calculated by dividing the total number of central outlets reporting square footage by the total number of such outlets on the public library outlet file. IMLS ensures as part of edit follow-up that the number of outlets reported on the public library outlet data file equals the number reported on the public library data file.

NOTE: Square footage is collected only from central and branch outlets (not from bookmobiles and books-by-mail only-outlets), and missing data are not imputed. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands).

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2011. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

— Not available.

† Not applicable.

¹This is the total number of branch outlets on the public library outlet data file. Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

²The response rate is the number of branch outlets on the public library outlet data file divided by the number of branches on the public library data file.

³The average square footage of branch outlets is calculated by dividing the total square footage reported by branch outlets by the total number of such outlets reporting the data.

⁴The square footage response rate is calculated by dividing the total number of branch outlets reporting square footage by the total number of such outlets on the public library outlet data file. IMLS ensures as part of edit follow-up that the number of outlets reported on the public library outlet data file equals the number reported on the public library data file.

NOTE: Square footage is collected only from central and branch outlets (not from bookmobiles and books-by-mail-only outlets), and missing data are not imputed. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands).

SOURCE: Institute of Museum and Library Services, Public Libraries Survey, Fiscal Year 2011. Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.
